Diamond Gard SPC, U-Protect SPC & LVT FLOORING

Marble | Cement | Terrazzo | Concrete | Sandstone

WWW.POWERDEKORGROUP.COM

INTRODUCTION

Alps Two inherits Alps by the tiles design of European traditional stone flooring and western decoration aesthetics. The collection offers various natural stone effects by its pattern options of marble, cement, terrazzo, concrete and sandstone.

In addition, customers also have high standards for waterproof and scratch-resistant performance to flooring products, therefore, vinyl floors, especially SPC, is chosen to be the flooring of Alps Two. Alps Two vinyl flooring is nature and aesthetic but also functional due to its waterproof properties as well as two special coating systems, Diamond Gard™ with ultra scratch resistance and U-Protect™ with ultra stain resistance. Additionally, optional IXPE backing can be attached under the flooring to achieve acoustic reduction, whilst the flooring can be also directly installed on any kinds of existing subfloors.

The applicable size of Alps Two are as follow, however, customization is available as well.

Coral

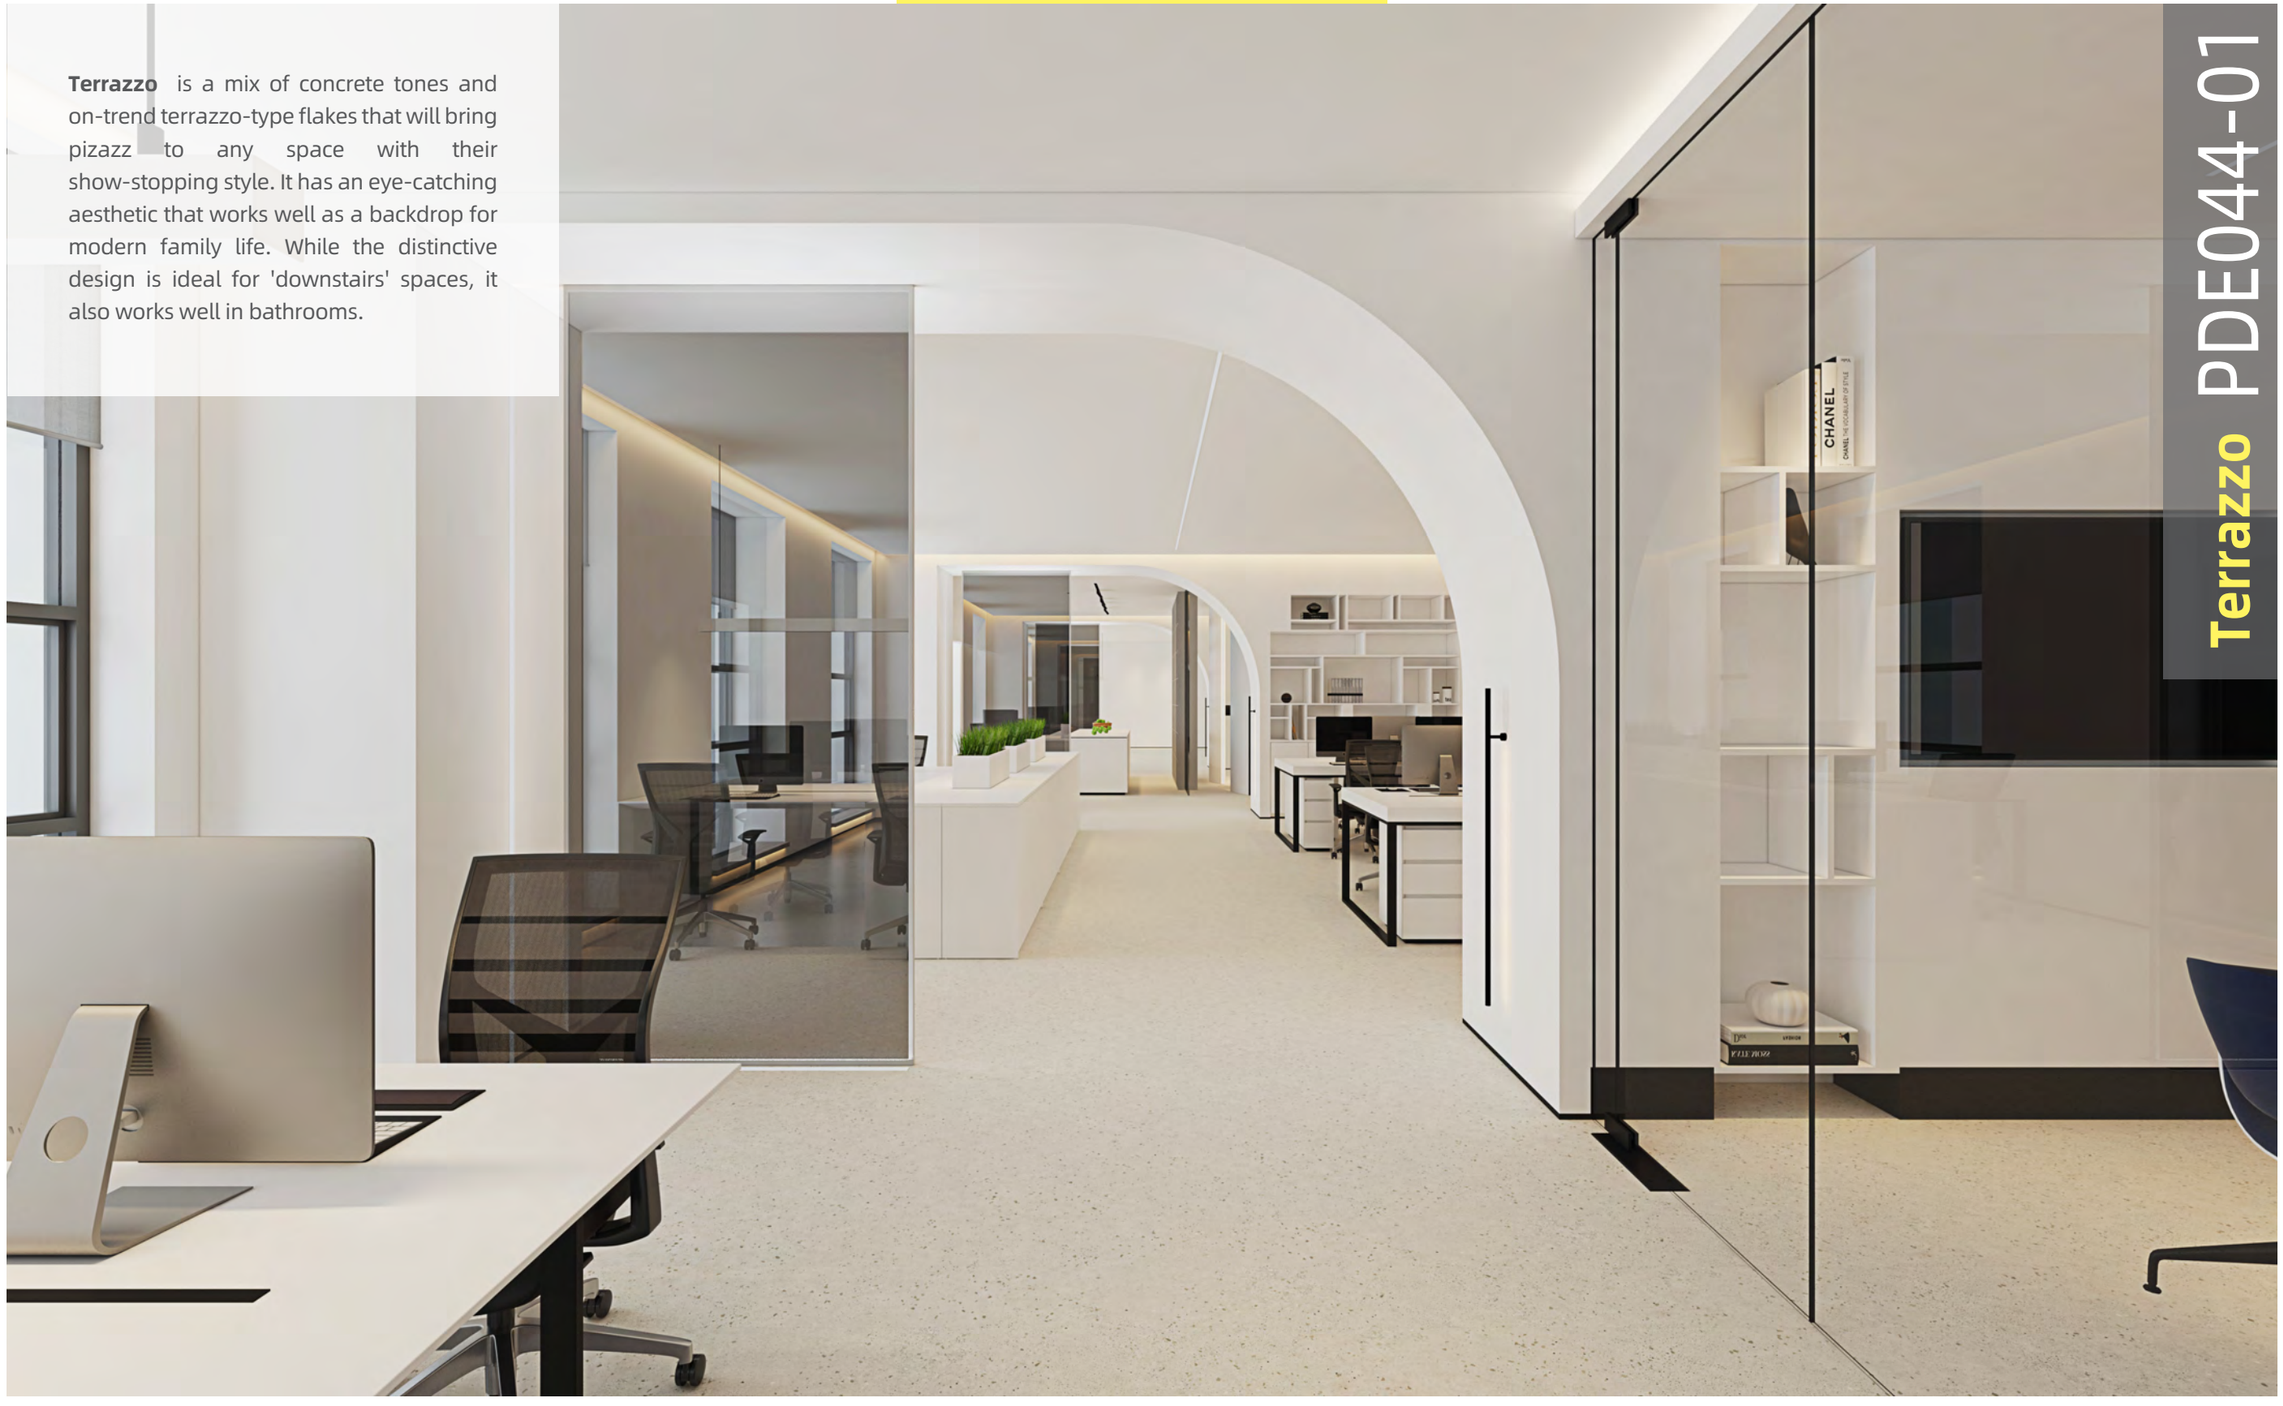
Marble is a cultural icon of refinement and heritage. Its natural coloration is created by minerals that were originally present in limestone before its crystallization. Marble, noble and sumptuous, reacts to its surroundings and daily use as to record the passage of time.

Marble PDE041-01

Cement is a sedimentary rock that has long been used in construction. It is especially used in many ruins, such as the Great Pyramid, are still standing today to be admired. The design is rich in texture and warmth, and can be used for both indoor and outdoor projects.

Cement PDE042-02

Terrazzo is a mix of concrete tones and on-trend terrazzo-type flakes that will bring pizazz to any space with their show-stopping style. It has an eye-catching aesthetic that works well as a backdrop for modern family life. While the distinctive design is ideal for 'downstairs' spaces, it also works well in bathrooms.



Terrazzo PDE044-01

Concrete PDE046-01

Concrete is an inspiration of recycling abandoned concrete structures. Over time, surfaces of the structure have worn away, eroding the plaster and exposing harder areas. This magic is defined by concrete, which reproduces it in a striking effect for contemporary living environment.

Sandstone PDE047-01

Sandstone reproduces blends of cements and marble chips. Alps Two recalls the history of Mediterranean design while also keeping up with the latest trends to give your project a distinct look.

Power Dekor U-Protect™

U-Protect™
Stain resistance system
power dekor

Eco friendly
19 toxic heavy metals free, 40 phthalates plasticizer free, formaldehyde free, extremely low TVOC emission. REACH Certified.

Stain resistance
Unique coating system makes it stain resistant, anti-bacterial and easy to clean and maintain. E.g., cleaning oily pen marks is a breeze of wind.

100% waterproof
A revolutionary composition made of polymer nano materials and natural inorganic compounds amplifies its waterproof property. Patented extra tight click prevents water from penetrating through the joints.

Power Dekor Diamond Gard™

Diamond Gard™
Scratch & scuff resistance system
power dekor

Scratch resistant
Think pets' claws. Drag heavy stuffs like furniture. With Diamond Gard ™ , don't worry about scuffs.

Impact resistant
Pointy shoes, dropped objects, heavy standing furniture may cause obvious dents. No problem to face these challenges with Diamond Gard ™ .

Cigarette burns resistant
Customers may inadvertently leave cigarette butts. Make your cleaning an easy job with Diamond Gard ™ .

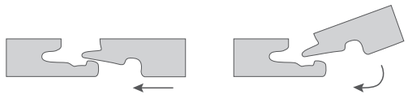
INSTALLATION

Alps Two takes advantages of Smart locking technology to make flooring installation much easier. These interlocking systems developed to provide maximum strength and best installation experience for its particular product category.

Uniclic Locking System

Angular / Snapping installation

The installation of Uniclic is fast and simple. The Uniclic profile can be classified as an angle or basic locking profile, which means it has to be installed by an angular rotation movement. Besides this angular installation method, Uniclic can also be installed in a horizontal way by snapping the planks into each other.



Valinge 5G-i™ Locking System

Push down installation

As a panel is folded down, a locking strip has been designed to smoothly bend due to each panel's guiding surfaces. When the guiding surfaces have passed each other, the locking strip flexes back and thereby pulls down the folded panel into a perfectly aligned and locked position.
